

Formed Vision

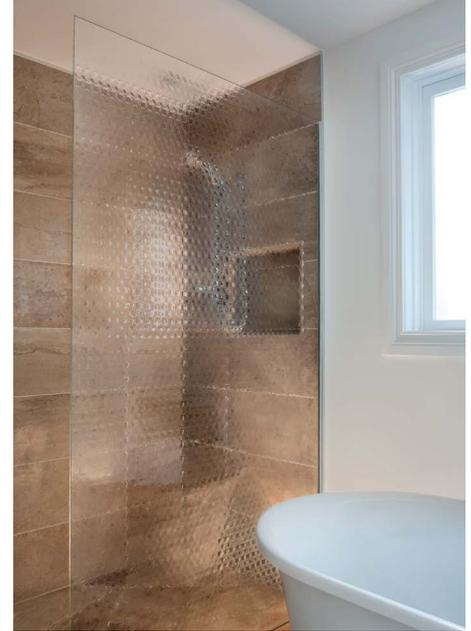

Formed & textured glass

Glassworks decorative range

Formed Vision is a collection of 3-dimensional formed glass made up of organic textures & dramatic impressions, for a glass surface that is second-to-none.

To further celebrate these patterns, Formed Vision also offers LED lighting & custom painting or the product can be cladded to bold or neutral surfaces to achieve a host of other looks.

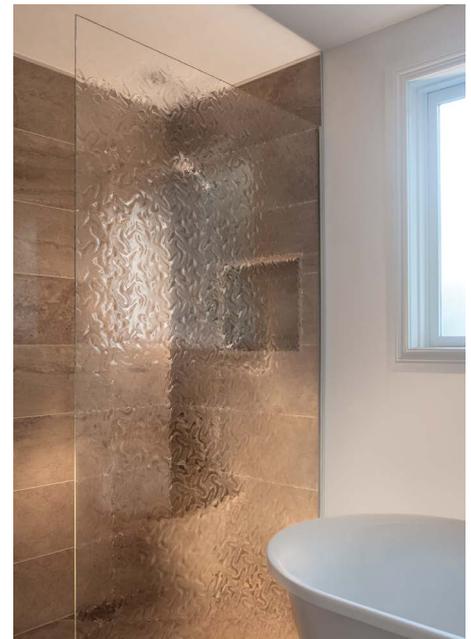

Structured Range

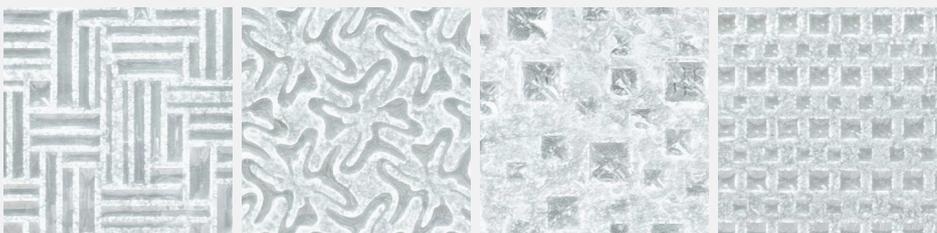

The Structured range of patterns offer consistent mechanical-style impressions in both large and tighter patterns, depending on their intended application.

Matrix is a sharp lineal based pattern of horizontal and diagonal lines which slips perfectly into larger installations. **Chicane** is a curvaceous flowing design, also on a large scale.

Fortuitous Square features an assortment of large and smaller square patterns which are somewhat random in shape. While **Petite Square** is a more structured design of smaller squares, ideal for both large and more intricate installations such as doors and workstation partitions.

Pattern Options

Matrix

Chicane

Fortuitous Square

Petite Square

Additional textures and custom are available on a project basis.

Available in clear glass. Or for an even higher quality finish with crystal effect, low-iron glass is available on request.

Panel Sizes

Texture	Maximum Panel Size
Matrix	2420mm x 1220mm
Chicane	2420mm x 1220mm
Fortuitous Square	2420mm x 1220mm
Petite Square	2420mm x 1220mm

Available glass thickness. 6mm, 10mm, 12mm

Formed Vision glass will be toughened to meet safety requirements when requested. 4mm toughened available to 2m² & 6mm toughened available to 5m².

Applications

- Shower screens
- Splashbacks
- Office partitioning
- Wall cladding
- Internal and external balustrading
- Lift lobbies and lift cars
- Facade windows
- Screening
- Doors
- Signage (incorporating custom etched logos)*

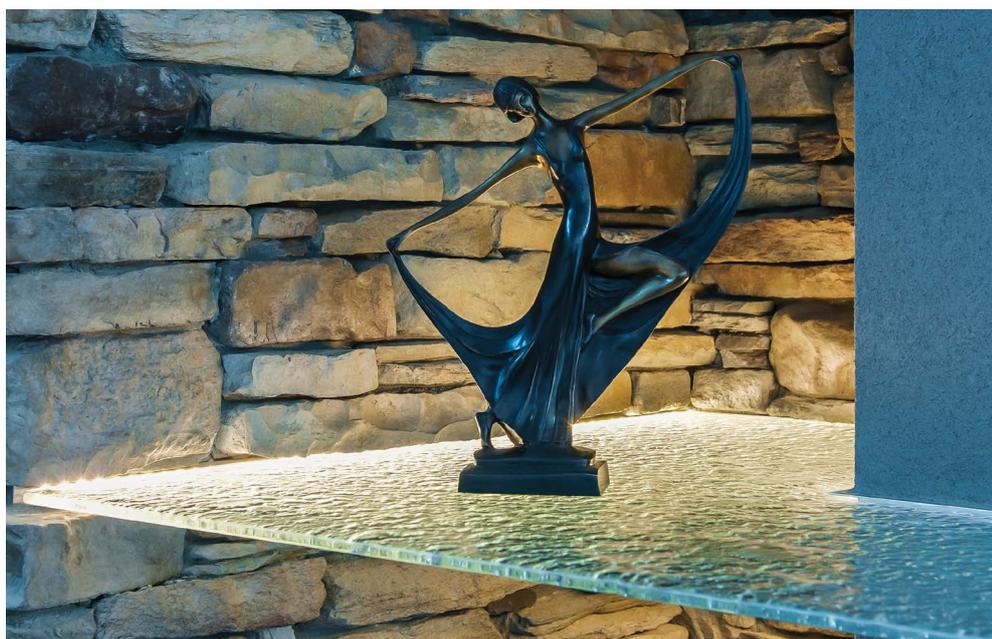

* Limitations apply and results may vary. Speak to Formed Vision about capabilities

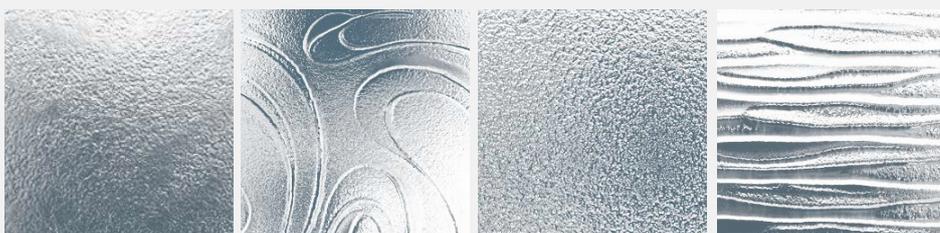

Earth Range

The Earth range of textures **Lieve**, **Cumulus**, **Sabbia** and **Aqua** emulate natural occurring earth and ocean surfaces. **Sabbia** is characterised by fine delicate indented impressions that emulate that of sand, while **Lieve** is even more delicate again and can be likened to the mist that occurs in the surf after a wave has subsided.

Cumulus is a dramatic form of swirls. Lastly, **Aqua**, as the name suggests, features larger but softer and more fluid curves and forms throughout.

Pattern Options

Lieve

Cumulus

Sabbia

Aqua

Additional textures and custom are available on a project basis.

Available in clear glass. Or for an even higher quality finish with crystal effect, low-iron glass is available on request.

Panel Sizes

Texture	Maximum Panel Size
Lieve	3100mm x 2400mm
Cumulus	3100mm x 2400mm
Sabbia	3100mm x 2400mm
Aqua	3100mm x 2400mm

Available glass thickness. 4mm, 6mm, 10mm, 12mm

Formed Vision glass will be toughened to meet safety requirements when requested. 4mm toughened available to 2m² & 6mm toughened available to 5m².
